CPL
CHEMISTRY AND PHYSICS OF LIPIDS

Volume contents

Volume 95 (1998)

Q. Zhou, Y. Yang, Z. Chen, A. Sun (People's Republic of China) *Effects of molecular structures on the olfactory responses of phospholipid membranes to four alcohols* 1
A. Cheng, B. Hummel, H. Qiu, M. Caffrey (USA) *A simple mechanical mixer for small viscous lipid-containing samples* 11
M. Schofield, L.J. Jenski, A.C. Dumaual, W. Stillwell (USA) *Cholesterol versus cholesterol sulfate: effects on properties of phospholipid bilayers containing docosahexaenoic acid* 23
A. Ambrosini, G. Bossi, S. Dante, B. Dubini, L. Gobbi, L. Leone, M. Grazia Ponzi Bossi, G. Zolese (Italy) *Lipid-drug interaction: thermodynamic and structural effects of antimicotic fluconazole on DPPC liposomes* 37
Z.-Q. Liu, L.-P. Ma, Z.-L. Liu (People's Republic of China) *Making vitamin C lipophilic enhances its protective effect against free radical induced peroxidation of low density lipoprotein* 49
M. Köberl, A. Schöppe, H.-J. Hinz, G. Rapp (Germany) *Cooperativity of glycolipid phase transitions: a critical comparison of results from equilibrium X-ray, density and microcalorimetric measurements* . . 59
H.I. Petrache, S. Tristram-Nagle, J.F. Nagle (USA) *Fluid phase structure of EPC and DMPC bilayers*. 83
C. Steinem, A. Janshoff, H.-J. Galla (Germany) *Evidence for multilayer formation of melittin on solid-supported phospholipid membranes by shear-wave resonator measurements* 95

Review article
G. Spiteller (Germany) *Linoleic acid peroxidation—the dominant lipid peroxidation process in low density lipoprotein—and its relationship to chronic diseases* 105

Original articles
J.M. Sturtevant (USA) *The effect of sodium chloride and calcium chloride on the main phase transition of dimyristoylphosphatidylcholine*. 163
J.A.C. Flipsen, R.A. Kramer, J.P.M. van Duijnhoven, H.T.W.M. van der Hijden, M.R. Egmond, H.M. Verheij (The Netherlands) *Cutinase binding and activity at the triolein–water interface monitored by oil drop tensiometry* 169

Short communication
H. John, W. Schlegel (Germany) *Thermodynamic and structural characterization of cis–trans isomerization of 12-(S)-hydroxy-(5Z, 8E,10E)-heptadecatrienoic acid by high-performance liquid chromatography and gaschromatography-mass spectrometry* 181
